# EASTERN ANGORA GOAT & MOHAIR ASSOCIATION NEWSLETTER

<http://www.angoragoats.com>

Vol 23

April 2016

No. 1

Dear EAGMA members,

Spring has sprung, or has it? Yes, it is the end of April, but as I write this snow is in the forecast. By now you all are probably finished kidding and have lots of happy healthy kids bouncing around.

The web site is currently being updated with new information for the fall show at SVFF on September 24-25. Sharon Chestnutt from Oregon will again be our judge. Check web page for show dates and times. We will also offer the red card show again. Information as to why you would show your goat in the red card show is explained on the red card entry form. We will also update the other entry forms explaining what the judge is judging for in the individual group classes.

Regarding the mohair pool: at this time I cannot commit to taking mohair to the warehouses in Texas. I have not yet been able to locate a large enough enclosed trailer to make the haul. My husband also is going to have surgery on both of his hands, and first cutting hay still needs to come into the barn. If any of the members are going to the warehouse and have room, please let us know. We can send an email to the members and work on coordination.

Hope all have an enjoyable rest of your spring.

Greta

*EAGMA was founded in 1987 as "VAGMA" (Virginia Angora Goat and Mohair Association) to foster and support, through education and marketing, small Angora goat farming, small mohair-based business, and the acceptance of a non-traditional farm animal. In 2008, in recognition of the growing diversity of the membership, VAGMA became the Eastern Angora Goat and Mohair Association.*

## The latest EAGMA 2016 SVFF Show News

The EAGMA Goat Show for 2016 will be at the Shenandoah Valley Fiber Festival at the fairgrounds in Berryville, Virginia on September 23-25, 2016. Sharon Chestnutt from Oregon has agreed to judge our show again this year. Sharon is one of the earliest breeders of colored angora goats and has been breeding them for over 30 years. In addition to judging the goats, Sharon will be teaching an Inspector Training Class for ACAGR on Friday evening, from 4-6 pm.

The goat show will also have Red Card classes again this year. These classes are an opportunity to show animals that are not fully white, so are disqualified from the white show, but do not exhibit enough color to show well in the colored classes. See the full class description on the website - Goat Entry Form.

The Mohair Fleece show process will be the same as 2015. Fleeces will be entered, judged, and sold (if noted for sale) at the SVFF fleece sale. Fleeces entries are processed in the Arts and Crafts Building on Friday, September 23rd from 10am to 2pm. All fleeces must have their SVFF form (and pay their fee). Each fleece to be judged will also need the EAGMA Fleece ID form (there is no additional fee from EAGMA). Fleeces will be judged Friday at 3pm in the same building.

## Members & Membership

Did you sell any goats as gifts this year? **Gift Memberships** are now available for a maximum of one year and may be purchased by a current EAGMA member to give to a non-EAGMA member customer to whom you have sold goats. The cost is \$10. At the end of that year, the new member will be encouraged to join for the following year for the usual fee of \$25.

A Youth Membership is available for anyone 18 years old and under for an annual cost of \$10. Youth Memberships do not have voting rights. The membership form on the web page will be updated soon so that the type of membership can be indicated.

## National News

**Texas:** The Texas Agricultural Experiment Station near Sonora, TX, is celebrating 100 years of service to the agricultural community. The foundation, land, and funding for the research station were spearheaded by four sheep and Angora goat raisers: Basil M. Halbert, Virge A. Brown, R.E. Taylor and J.B. Murrah. The original goal for the institution was to study diseases, breeding, and management of sheep and goats under range conditions. The full article is here:

**National News (historical):** In May, 2012, the Voice of America radio station broadcast a short piece on cashmere and Angora goats. The broadcast and the transcription are available here:

## International News

**Germany:** The toy company Steiff has created a limited edition, high-quality, hand-made, and very expensive stuffed animal version of the animated creature Pikachu out of mohair. This cuddly little toy is expected to go on sale only in Japan for about \$370.

“From ‘Pokémon’ comes a plush doll of Pikachu made by the German company known worldwide for their high quality teddy bears, Steiff! Pikachu is made from the finest natural mohair which is wonderful to the touch, creating a plush doll that not only looks amazing but is also lovely to feel as it sits by your side.

“Each Steiff Pikachu will be carefully hand-made, with a first release of exactly 1000 units to be released in Japan only. Experience the highest quality Pikachu plush ever!”  
quote source:

<http://mikatan.goodsmile.info/en/2015/12/03/steiff-pikachu/>

**South Africa:** The new South African mohair industry headquarters is about to open in Walmer, Port Elizabeth. The state-of-the-art building, costing more than 8 million rand, will be the new home for mohair industry representatives. It will also house a library and a crafting space for young designers and students. Ground breaking was April of 2015, with expectation that the building will be ready for occupancy later on this year.

**Australia/New Zealand:** Mohair producer “GT” Ferreira has been working in both Australia and New Zealand to promote his vision of the mohair industry as one which caters to the weaving houses of the world. He advocates

breeding and production with the following five items of importance (ranked from most to least important):

1. Fiber length
2. Strength and elasticity
3. Elimination of medullated fibers
4. Lustrous style
5. Micron and fineness

Further, Mr. Ferreira advocates for clean-faced and clean-legged Angoras. He contends that Angoras should not look like poodles, and that the extra hair just causes stress on the goat by requiring more energy to grow it only to throw it out during shearing.
